

2nd INGENIUM Symposium

October 5 & 6, 2022

University of Rouen Normandy – CURIB

The INGENIUM network is strongly committed to European and global issues, which are materialised around the Sustainable Development Goals (SDGs) in the United Nations 2030 Agenda for Sustainable Development and the European Commission's European Green Deal (EGD) growth strategy.

In order to reflect on this subject collectively, the partners will meet in Rouen on October 5 and 6, 2022 for the second edition of the INGENIUM Symposium.

8:00 pm - Diner, Café Hamlet (186, rue Martainville, 76000 Rouen)

Sustainable Development & Social Responsibility at the heart of URN's strategy

The challenges of the socio-ecological transition have been at the heart of the University of Rouen Normandy's actions for more than 10 years. Awarded in 2020, the Sustainable Development and Social Responsibility (DD&RS) label is the ultimate recognition of the University of Rouen Normandy's engagement in transitions (T.URN). Since then, our institution has been deploying an ambitious sustainable development and social responsibility strategy embracing both the impact of its activities on its campuses, as well as its training and research missions.

One of our ambitions in terms of sustainable development and social responsibility is to get involved with our partners for a territory of sustainable innovations. Hosting the second edition of the INGENIUM Symposium in Rouen illustrates perfectly our determination. Focused on socio-ecological transition of European Universities, the event has been labelled "COP21" by the intercommunal structure Métropole de Rouen Normandie. Thus, the organisation of these two days is part of an eco-responsible and environmentally conscious approach.

Address of the event :

University of Rouen Normandy
UFR Sciences et Techniques
Centre Universitaire de Recherche et d'Innovation en Biologie (CURIB)
25, rue Lucien Tesnière
76821 Mont-Saint-Aignan cedex
