

HRS4R survey: Professional aspects and Ethics.

Synthesis

Writing: Sylvain Chambreland, project manager

1st quarter 2022.

Preamble:

This survey was carried out over a period of one quarter in 2021-22 as part of the initial phase to obtain the European Seal of Excellence HRS4R

It concerns all staff working at the University, including the staff of the EPST accommodated.

A focus was made on the following populations:

1. Général : General = all staff
2. Unités de recherche : Research units = all personnel attached to a research unit
3. Doctorants : PhD students = PhD students
4. Services = all staff attached to the central services of the university.
5. Composante : Components = all personnel attached to a component (researchers are attached to research units)
6. Femme
7. Homme
8. Contractuels : Contractors: all contractors who are not PhD students
9. CNRS/INSERM: EPST staff in research units.

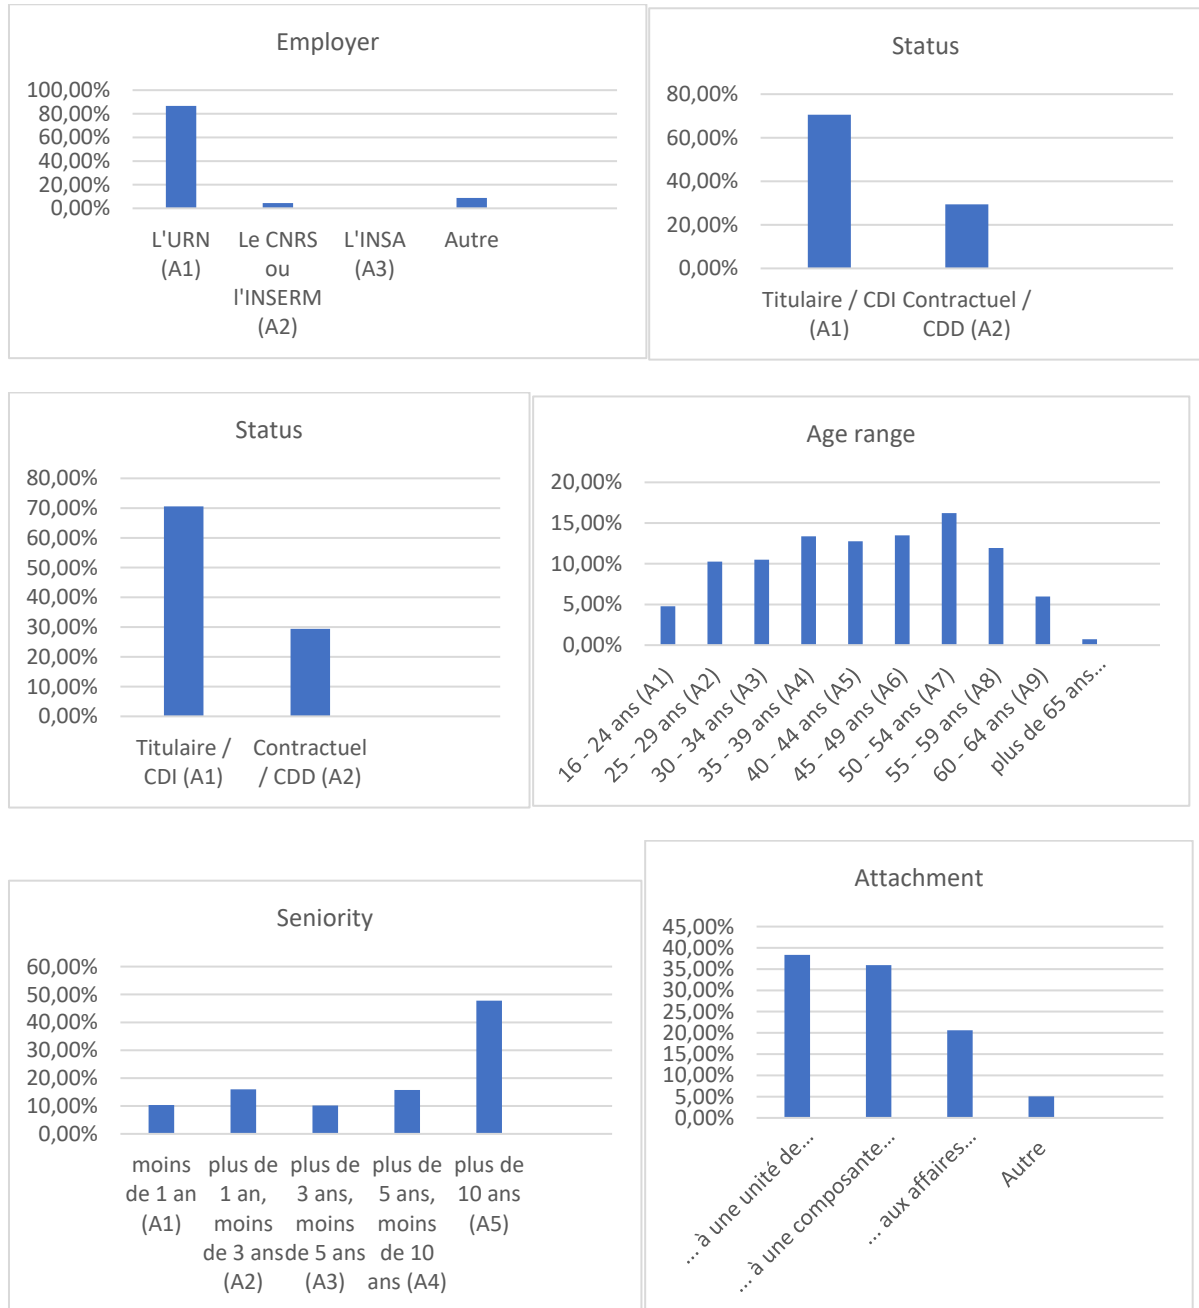

This document presents statistics for the above categories. Two values can serve as a reference for any interpretation: the general statistics and the statistics of EPST staff, knowing that the CNRS and INSERM have been certified for several years.
